

MC961

FOR HIGH SPEED SWITCHING APPLICATION
SILICON EPITAXIAL TYPE(COMMON ANODE)

DESCRIPTION

MC961 is a small type resin sealed silicon epitaxial type double diode. It is especially designed for high speed switching application.

Due to the small pin capacitance, short switching time (reverse recovery time), It is most suitable for high speed switching application and limiter, clipper application.

FEATURE

- Small pin capacitance
- Quick switching time
- High voltage
- Good two element characteristics

APPLICATION

For general high speed switching of audio machine, VTR.

OUTLINEDRAWING

Unit : mm

JEITA : —

JEDEC : —

TERMINAL CONNECTER

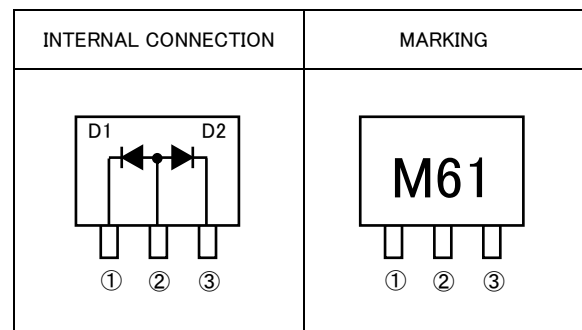

① : CATHODE 1

② : ANODE (COMMON)

③ : CATHODE 2

MAXIMUM RATINGS (Ta=25°C)

Parameter	Symbol	Ratings	Unit
Peak reverse voltage	V_{RM}	75	V
DC reverse voltage	V_R	50	V
Surge current (1 μ s)	I_{FSM}	4	A
Peak forward current	I_{FM}	300	mA
Average rectification current	I_O	100	mA
Total allowance dissipation	P_T	450	mW
Junction temperature	T_j	+150	°C
Storage temperature	T_{stg}	-55 ~ +150	°C

ELECTRICAL CHARACTERISTICS (Ta=25°C)

Parameter	Symbol	Test conditions	Limits			Unit
			Min	Typ	Max	
Forward voltage	V_{F1}	$I_F=10mA$	-	0.77	0.9	V
	V_{F2}	$I_F=50mA$	-	0.90	1.0	
	V_{F3}	$I_F=100mA$	-	0.95	1.2	
Reverse current	I_R	$V_R=50V$	-	-	0.1	μ A
Pin capacitance	C_t	$V_R=0V, f=1MHz$	-	2.8	4.0	pF
Reverse recovery time	trr	(Refer to test circuit)	-	-	4.0	ns

TYPICAL CHARACTERISTICS

Keep safety first in your circuit designs!

·ISAHAYA Electronics Corporation puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (1) placement of substitutive, auxiliary, (2) use of non-flammable material or (3) prevention against any malfunction or mishap.

Notes regarding these materials

- These materials are intended as a reference to our customers in the selection of the ISAHAYA products best suited to the customer's application; they don't convey any license under any intellectual property rights, or any other rights, belonging ISAHAYA or third party.
- ISAHAYA Electronics Corporation assumes no responsibility for any damage, or infringement of any third party's rights, originating in the use of any product data, diagrams, charts or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams and charts, represent information on products at the time of publication of these materials, and are subject to change by ISAHAYA Electronics Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact ISAHAYA Electronics Corporation or an authorized ISAHAYA products distributor for the latest product information before purchasing product listed herein.
- ISAHAYA Electronics Corporation products are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact ISAHAYA Electronics Corporation or an authorized ISAHAYA products distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of ISAHAYA Electronics Corporation is necessary to reprint or reproduce in whole or in part these materials.
